Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

This row of ten two-story, two-bay wide houses late Italianate-style brick houses with shed roofs and wooden scroll-sawn bracketed cornices were built in 1891 by Henry Westphal and August Weber, major builders of working class houses in East Baltimore. The houses retain their original brick facades, which have been painted, and evidence remains that their basements were originally painted white, to imitate the marble used in more expensive houses.

The houses are two stories in height, 12' wide, and occupy lots 61' deep. Each house is three small rooms deep and there is no back building. The houses are constructed in running bond and were originally painted. The basement area was painted white, to imitate marble, as was common in houses of this type. Each house has a single hooded chimney located at the rear corner of the house. The shed roofs are capped by a continuous wooden cornice consisting of a crown molding supported by long scroll-sawn brackets decorated with grooves, connected by a lower molding strip, and ending with a distinct trefoil pattern. The frieze panel, which also serves as ventilation for the attic, is decorated with a row of scallop shapes, created with a jig saw.

The tall, narrow window and door openings have segmentally arched brick lintels and scroll-sawn tympanums. Several of the original 2/2 sash survive. The sills are wood. The single light doorway transom is decorated by a cut-work band of scallops. The houses sit on high basements, lit by a double-light sash, also with a scroll-sawn tympanum. Each house was originally reached by four wooden steps.

Specific dates 1891

Builder/Architect Henry Westphal and August Weber

Prepare both a summary paragraph of significance and a general statement of history and support.

This group of houses is significant in that it represents the level of architectural stylishness achieved by many builders of small street houses in the late nineteenth century. The houses were built by Henry Westphal, a fairly prolific Baltimore builder, according to a pattern that was quite common to the city's working class neighborhoods of the period c. 1880 to 1910. Recognizing that workers held different levels of jobs (and pay), builders created a hierarchy of house sizes (and prices) in the new neighborhoods going up to serve the expanding factory districts ringing the harbor and north-east of the central city. Builders acquired anywhere from an eighth to a half of a city block and built 14' to 15'-wide two-story houses on the main streets, and smaller, 11' to 13'-wide two-story houses on the narrower streets bisecting the blocks. In this particular case Westphal and Weber developed the entire eastern half of the block, building only 12'-wide houses on both the east sides of Regester Street and the west side of Ann Street north of Crystal.

Westphal and Weber sold most of the houses they built on Regester and Crystal Streets to Bohemian-American owner-occupants, who received their mortgages from the Bohemian Permanent Building and Loan Association, among others. Buyers included Henry Roehmer, a cooper; John J. Pfister, a painter; and Anton Tokar, a brassworker. Other houses went to local investors interested in obtaining rental income, but also making available affordable homes—at about \$8 a month rent—to those not yet able to make the substantial down payment necessary for a home purchase.
